An interest in the middle ages often brings the non-specialist reader up short against a word or term which is not understood or only imperfectly understood. This dictionary is intended to put an end to all that: it has been designed to be of real help to general readers and specialists alike. The dictionary contains some 3,400 terms as headwords, ranging from the legal and ecclesiastic to the more prosaic words of daily life. Latin was the language of the church, law and government, and many Latin terms illustrated here are frequently found in modern books of history of the period; similarly, the precise meaning of Old English and Middle English terms may elude today's reader: this dictionary endeavours to provide clarity. In addition to definition, etymologies of many words are given, in the belief that knowing the origin and evolution of a word gives a better understanding. There are also examples of medieval terms and phrases still in use today, a further aid to clarifying meaning. CHRISTOPHER COREDON has also compiled the Dictionary of Cybernims. Dr ANN WILLIAMS, historical consultant on the project, was until her retirement Senior Lecturer in medieval history at the Polytechnic of North London.
