Minute Help Guides : A Newbies Guide to iPod Nano before purchasing it in order to gauge whether or not it would be worth my time, and all praised A Newbies Guide to iPod Nano:

2 of 2 people found the following review helpful. TerrificBy jendavI purchased this for someone new to the i-pod etc. experience--straight forward, simple, pictures helpful. The book is 8" x 11" and thinish. The print is normal-sized, not microscopic and the guide is actually useful, not one of those encyclopedic things you see in stores. It gives step-by-step instructions on how to use i-pod nano, i-tunes, what other accessories are needed but not included in the ipod nano case.1 of 1 people found the following review helpful. Just stopsBy Bradford A BaldusThis is a clear and interesting quick reference. The author even gives some history and context but the text just stops as if he reached his deadline and just turned in what he had. Referring to Bluetooth the author says something to the effect that it would be addressed later in the book. The book, however, ends shortly thereafter with no further reference to Bluetooth, something that really should have been discussed if the device is capable of using it.0 of 0 people found the following

review helpful. Basic guideBy A CustomerQuick and dirty lesson but it does cover the material well. I got the information I was looking for without a lot of fluff.

The iPod Nano has been through seven different iterations since its introduction in 2006. Perhaps even more so than with the much-heralded iPhone and iPad, the Nano is Apples favorite device to experiment with: larger capacities, different screens, complete redesign the Nano has been a lot of different things over the years. But this seventh generation is something else entirely a multi-touch powerhouse that features pretty much everything youd ever want in an MP3 player, and a few things you didnt even know youd need. This guide will take you through the ins and outs of the iPod Nano from working with iTunes to using the built-in pedometer. Well show you everything you need to know, saving the fluff for people who have time to waste. Ready? Lets do this!
