By Raleigh man
For three bucks, this is a real bargain. I felt, when I decided on this book, that all I needed was a kick-start and then I could figure things out for my semi-techie self. But a brand new tablet with an OS I had never used is proving too much for me even with the help of this book. So I'm suggesting you get this if you don't need to drill down and figure out every nook and cranny and get it even if your goal is an initial book to get you started. For me though, I also need something more like a manual with considerable detail so this is not my sole reference for my new Surface 2 but happily a part of my collection.

By Bob Juch
There was no original content in this. It was just a duplication of what's in Microsoft's help however it was a better presentation.

By Richard Lennon
I like the book because it is a quick way to learn the basic ways to work with Windows RT. It is very different from previous ways to accomplish tasks in a Windows platform. After a time the new gestures and locations of certain menus make sense and they become easy to work with. This book helps in speeding up the process.

Since the introduction of the iPad in 2010, the entire world has gone tablet crazy. While Apple pretty much created the mainstream market for these devices, Microsoft actually got there first with hybrid tablet/laptops running Windows that have existed since the 90s. Unlike Apple, Microsoft doesn't generally produce their own hardware; they prefer to let dozens of manufacturers fight over standards and pricing. In fact, the Surface RT is the first computer Microsoft has ever made. The Surface RT is one part of a larger reinvention of Microsoft's core product, the Windows operating system. Windows 8, a special version of which powers the new Surface Tablet, is the most significant update that Windows has ever seen. There's a little bit of a learning curve, but we're confident that by the time you finish reading this guide, you'll be singing the praises of this unique device to anyone who'll listen. Ready? Let's jump right in!
