**Jill Bailey : A-Z - Bugs** before purchasing it in order to gauge whether or not it would be worth my time, and all praised A-Z - Bugs:

Flyers, creepers, and crawlers from Ants to Zebra butterflies, and every one in between! Also includes introductory pages on the evolution of bugs, scientific classification, and fascinating facts about bug reproduction.

"...This book is nature illustration at its best... If possible, elementary school media centers will want multiple copies of this book, but middle and even high school science teachers will also find this book a great addition to their units on insects. Bugs have never been presented in such glorious illustrations." -- Library Media Connection (January 2003) (Library Media Connection 20030101)
