MISSING MILEAGE SEGMENTSBy JordanThis map is amazing. very detailed and very easy to read, amazingly durable as well. i give it three stars because they are missing a MAJORRRRR feature on this map that i think is massively important. there are no mileage segments on the trails to tell you how many miles are in between segments. You will go on your hikes not knowing the exact distance. The scale can't always be perfectly accurate. The other Nat Geo area maps ive gotten of washington DO have them so i dont see why they couldnt add that. VERY disappointed0 of 0 people found the following review helpful. Another Great National Geographic Trails Illustrated MapBy J. VandergriffThe map gives me what I wanted regarding trails and geographic features. The only thing that keeps me from giving it a full 5 stars is that when it arrived (with other maps), it was folded-over inside a plastic overwrap that creased the map. I'm picky about keeping my maps pretty pristine, so I found this less than satisfactory. (Actually, the other maps in my order were in perfect condition in the package--only this one was mildly mangled.)Otherwise, it's the same very high quality I've come to expect with the Trails Illustrated Maps--an excellent quality that has been maintained after acquisition by National Geographic.I'd highly recommend this map if you're traveling to this area and have an interest in the topography and back-country travel.0 of 0 people found the following review helpful. Great map to haveBy JW1979Great map for those who want to leave the blacktop and venture away from civilization for a while. We keep this map in the car at all times just in case we get lost in the maze that can be the Mt Baker-Snoqualmie NF.

Expertly researched and created in partnership with the U.S. Forest Service and others, the map covers the wilderness and the surrounding parts of the Mt. While the area's rugged, glacier-carved terrain is dominated by tens of peaks and hundreds of lakes, other key points of interest include Skykomish and Wenatchee River, Lake Eaton State Park and Stevens Pass. All trails are clearly marked and color coded according to their designated usage, whether you're traveling by foot, horse, mountain bike, or motorized vehicle. The Pacific Crest and Pacific Northwest Trails, which snake through the area, are highlighted. For those who prefer exploring in a motorized vehicle the Mountains to Sound and Stevens Pass Greenways are both indicated, as well as OHV routes and high clearance roads. The map base includes contour lines and elevations for peaks, summits, passes and the hundreds of lakes. Valuable wilderness regulation and safety tips are also included on the map, along with useful contact information. Many recreation and adventure features are noted as well, including campgrounds and primitive campsites, horse camps and corrals, downhill and cross-country ski areas, snowmobile trails, boat launches and fishing areas.
