1 of 1 people found the following review helpful. but it was also fantastic for bouncing between Austria and southern Germany By _ This map covered all of what we needed and more. I bought it for our trip to Austria, but it was also fantastic for bouncing between Austria and southern Germany, and then later when we drove down through Slovenia into Croatia. There is no city detail, but we used the free app Maps.me to download offline maps (which was awesome in Europe) which helped us with GPS and general navigation through spots that the NatGeo map was not detailed enough in. 0 of 0 people found the following review helpful. Good quality By Happy guy Gives a good overview of the area but I still needed smaller scale maps which I got for free from the tour operator. 0 of 0 people found the following review helpful.
