Fire stick compared to other satellite and cable viewingBy Dale Sims, Sr.The book is good at explaining more about the sticks job but I still do not know the answer to my main question? How does this compare, price wise, to cable or satellite t.v. for monthly usage cost? We are not able to afford those monthly charges and so have opted for antenna t.v. and a Net-Flix combo, currently. Can anybody answer this? Also, one reviewer stated that the t.v. connection must be a 1.0 rather than a 0.5 connection. How do we know which ours is is there a work-around device for this issue?
