Janet Amundson Romich : An Illustrated Guide to Veterinary Medical Terminology Fourth Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised An Illustrated Guide to Veterinary Medical Terminology Fourth Edition:

0 of 0 people found the following review helpful. Purchase Only If You Are In School By Mower of Mutts What I was not aware of by the description is this book is designed for students taking the classroom course. Something that the description failed to mention other than "textbook" of which many of you do not need to be in a class to get the benefit. As others have mentioned you will never know the correct answers if you are not a paying student. For me it was a very pricey waste of money since it is not a stand alone book for study. While the first few chapters could be helpful I would not recommend it without an instructor using the book in class. If you are a student where this book is used, I

can see where it would be very helpful and make learning certain things easier. A review mentioned the word fun where indeed I can see with this book that would be a good description. Still baffled why it came from Belgrade? 1 of 1 people found the following review helpful. Spelling errors By Dovahkiin It has a lot of great information and pictures, the problem I have with it however is all the misspellings in it. My teacher says the information is accurate, just the spelling is bad. If you can get past that its a great study tool. 0 of 0 people found the following review helpful. A required text, but a good one By S. Harbour This is a require text for one of my Veterinary Tech classes. This is actually a pretty amazing book because it does a really nice job at making what can be pretty dry memorization, into something that might even be called fun (ok, that's stretching it a little bit.) The illustrations are good, chapter titles are humorous, and each chapter has a LOT of practice questions at the end. Unfortunately, it did not come with an answer key. It's pricey, but most textbooks are.

Providing the ultimate terminology reference for veterinary assistants and technicians, AN ILLUSTRATED GUIDE TO VETERINARY MEDICAL TERMINOLOGY, 4e provides an engaging, systematic approach to learning medical terms and understanding basic principles of veterinary medicine. This user-friendly textbook delivers a unique pedagogical presentation that makes it a comprehensive learning resource. Focusing on how medical terms are formed, analyzed, and defined, the text discusses anatomical landmarks, the positioning of animals, and the relationships between body parts. It also introduces terms used in the animal industry. Case studies illustrate how medical terminology is experienced in real-world practice, and an audio wordlist enables readers to hear the terms they are learning.

1. Ready, Set, Go. 2. Where, Why, What. 3. Meat and Bones. 4. Head and Toe (And All Parts in Between). 5. What is in a Name? 6. Gut Instincts. 7. Null and Void. 8. Have a Heart. 9. Drugs and Dissection. 18. Like Cats and Dogs. 19. Horse Sense. 20. Make Room for Ruminants. 21. Hog Haven. 22. Birds of a Feather. 23. All the Rest. Appendices. Index. About the Author Janet Romich, a longtime veterinarian, teaches a variety of science-based courses at Madison Area Technical College in Madison, Wis., where she was honored with the Distinguished Teacher Award in 2004 for use of technology in the classroom, advisory and professional activities, publication list, and fundraising efforts. She is also an IACUC member for a hospital research facility and received the Wisconsin Veterinary Technician Association's Veterinarian of the Year Award in 2007 for her contributions to the education of veterinary technician students and in promoting the use of veterinary technicians in the workplace. Dr. Romich is also the author of FUNDAMENTALS OF PHARMACOLOGY FOR VETERINARY TECHNICIANS, 2e and UNDERSTANDING ZONOTIC DISEASES as well as a co-author on DELMAR'S VETERINARY TECHNICIAN DICTIONARY. She received her Bachelor of Science degree in animal science from the University of Wisconsin-River Falls and her Doctor of Veterinary Medicine and Master of Science degrees from the University of Wisconsin-Madison. She remains active in veterinary practice through her relief practice, where she works in both small- and mixed-animal practices.
