Jannie Brisseau : Animals (For North America) (Around the World) before purchasing it in order to gage whether or not it would be worth my time, and all praised Animals (For North America) (Around the World):

Young children will be introduced to the world in Barron's new pictorial encyclopedic series called Around the World. These illustrated books contain page after page of colorful pictures that tell the story of the world in a way that children will understand. The Around the World series is being introduced with two books, Animals and Children, by Jannie Brisseau. In each of these attractive volumes, children learn about living creatures that exist worldwide. Animals live on farms, along rivers, under sand, and in the ice cold water. This Around the World book gives children a glimpse at the different living creatures that survive in all of the worlds environments. Starting with house pets and barnyard animals and ending with animals of the rainforests, deserts, and polar regions, Animals is a wonderfully descriptive educational guide. The illustrations in both Children and Animals are rendered in a naturalistic style, and the captions are written specifically for young readers. The Around the World series will take children on an exciting,

unforgettable journey across the globe.
