After going through another book, i learned so much more with this one. What I liked most is that the quick quizzes after each section are tougher than the lesson problems. So, they bring you up another level once you have mastered the lesson. E.g., I am better at sentence correction and breezed through those lessons, but got slowed down in the quiz. Each lesson takes ~1 hour, so the 24 hr thing refers to 24 man-hours of study, not day hours. I spent two weeks on the book. 11 of 11 people found the following review helpful. Excellent....but BEWARE, some errors By A Customer I thought that a few of the answers might have been erroneous,

and then I confirmed it. There's a few errors in the math section (i.e. pg 109 prob 10...x can equal 1 or -1). But other than that, this is a great book...quick and thorough...doesn't waste time...review is the best I've read. It explains how the test is scored better than the other books too which I think is vital. If you only have time for one book, use this one. 5 of 5 people found the following review helpful. A Good Buy for Getting Familiar with the GMAT By A Customer I bought this book six weeks in advance of taking the GMAT. This book is great for getting you familiar with the test and showing common testing pitfalls. I felt like I needed the most help with the Verbal section and this book helped me to decipher what the GMAT question was really asking me instead of what I thought it was asking me. My unofficial results show an OUTSTANDING grade.

Fast-paced preparation for the GMAT CAT. This guide is specially made for students who wait for the last minute. Designed for fast-paced learning as the clock ticks down to test day, the book consists of just 24 easy lessons that can be completed in an hour or less. Each lesson presents a basic test topic in superconcentrated form, and then moves quickly to intensive, hands-on practice that builds skills and boosts scores. Because the study topics are divided into small, manageable units, the learning process is never overwhelming. Even if there's little time left, this friendly tutorial makes every hour count toward higher scores!
