**Hakan Oral MD : Atrial Fibrillation, An Issue of Heart Failure Clinics, 1e (The Clinics: Internal Medicine)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Atrial Fibrillation, An Issue of Heart Failure Clinics, 1e (The Clinics: Internal Medicine):

With over 6 million patients affected only in the United States, atrial fibrillation (AF) is a major health problem with profound effects on both the individual patient and society at large. In this issue of *Heart Failure Clinics*, we have focused on AF and tried to cover the most important and relevant aspects in a comprehensive and contemporary review. A distinguished group of experts and leaders in basic and experimental electrophysiology, epidemiology, clinical pharmacology, interventional clinical electrophysiology, and cardiac surgery contributed state-of-the-art reviews and also shared their insight to the future of AF. Topics include but are not limited to: Risk Factors and Genetics of Atrial Fibrillation; Mechanisms of Atrial Fibrillation: Rotors, Ionic Determinants, and Excitation Frequency; Diagnostic Evaluation and Follow-Up of Patients with Atrial Fibrillation; Catheter Ablation of Atrial Fibrillation; Antithrombotic and Anticoagulant Therapy for Atrial Fibrillation; Postoperative Atrial Fibrillation: Incidence, Mechanisms, and Clinical Correlates; and Novel Upstream Approaches to Prevent Atrial Fibrillation Perpetuation.
