Before buying the book, we had already bought our crib, changing table, registered, and were on our way. We felt quite confident in our decisions, although they were hard to make. Getting advice from friends and family on what to get can be quite overwhelming. As an example -This book may have helped us from making a mistake that would have endangered our baby. The crib that we bought was the worst crib that you could buy on the market. The brand (Delta) had the biggest major recall in the U.S. in 2008, and had been recalled earlier for lead paint, etc. Needless to say, we are thankful that we never took it out of the box, and returned it the same day we read about it in Baby Bargains. This information was not readily available on the web, especially for first time parents who have no clue where to look. This book helped us make important safety decision in regards to everything baby. It warned us about Delta, but made us feel confident about our travel system choice, among other things. The book Baby Bargain refers to saving money, or cutting back, when having a baby. Most excellent for this economy. However, most of the information is common sense, and the other you could probably find on the Internet. They claim that the book will help you save more than 250 dollars when preparing for a baby, they actually guarantee it. I do not necessarily believe that, but with respect to our crib...I feel that information was/is priceless!! Thanks Baby Bargain!!! 5 Stars

I ended up with a booster seat that at 2 years old, my son is still too small for, so it is gathering dust and taking up space in a closet. And after buying the suggested carseat, a Chico keyfit, I realized that it only fits kids up to 25lbs, and my bookster is for kids that are 30lbs plus, so for the year that my son has weighed between 25lb and 30lbs I had to buy a THIRD \$200 carseat! How frustrating! Also, the best advice a mom could possibly ever get- Register at Diapers.com NOT Babies R Us... is not in this book! Babies R Us won't let you return gifts, even if they were purchased at the store and are on your registry, after a short window has expired. So if people buy you gifts for a baby shower, and you end up with multiple items, you may not be able to return the multiples items to Babies R Us after the baby is born because the window has expired. Diapers.com, ships free, is CHEAPER, has wonderful service, and gives you 365 days to return! Much better! This is the type of advice I was expecting from this book! Still I give it 4 stars because the advice they provide is good and helpful in navigating the confusing world of baby products.

It was well-researched and seemed relatively unbiased. I relied on it for info on ALL of our major baby purchases. When we found out we were having #2, I eagerly ordered the new (8th) edition. I'm not sure what changed, but some of the integrity and lack of bias has gone out the window! I am SO disappointed! In the previous edition, there were several instances where they were honest about admitting when they didn't have all the info on a given product, and therefore couldn't make an informed judgment. It definitely would have benefitted their readers if they were a little more honest about that in this edition as well. There is still some good info, which is why I gave it the rating I did. However, be on the lookout for biased information!!!

Oh baby! With the average newborn racking up \$7,000 in expenses for the first year alone, expectant moms and dads need all the creative cost-cutting ideas they can find. Baby Bargains is the answer. Inside, parents find detailed ratings and reviews of baby gear, plus handy charts that compare brands and models. Since its release in 1994, BABY BARGAINS has sold over 800,000 copies.
