A must have for moms to be!By CarideeIn the overwhelming world of baby products it's so hard to identify what's actually a good choice for your new baby, and what's a bad product or a waste of time and money. You could go to all of the product websites and have each product tell you how great it is, or you could listen to non-biased consumer research in the form of Baby Bargains. Recommended on mommy sites everywhere this book is incredible for identifying the best products in all of the necessary categories from clothes to furniture to necessities, it covers all the bases and does a great job of helping you build your baby registry with the most effective choices. I also like how they always give you 3 good options for each of their product categories, good-better-best. All three are good choices but it falls into what is your budget for that item. I loved it because my budget was smaller but I knew I was still getting good products for my money! So far, everything has been a good choice. HIGHLY recommended for parents-to-be!1 of 1 people found the following review helpful. Some great advice/reviews but you can find all this information from reviewsBy J McDSomeone highly recommended this book and there is definitely some good advice in it as far as what are smart buys (avoid buying changing tables since can use a dresser with a pad instead). The main purpose of the book is to rate the different options out there for every type of big baby purchase (car seat, crib, glider, etc). They rate these items based on customer reviews from websites and feedback and testing it themselves. So when we were on the search for a car seat I opened the book and go through all the different ones that listed the pros/cons and the grade. I would then get on to see the price, and would then read the reviews and find that I learned more from reading the reviews then I did from reading the book's review. So for me, who uses reviews for many of my decisions, I didn't get much use from this book since all it does it compile the reviews and summarizes it in one place. For those who aren't big online shoppers/review readers and will buy many of your purchases in stores, then this might be a great buy for you!1 of 1 people found the following review helpful. Must-Have Book for All ParentsBy Thomas RosswaagThis book is incredible! When my wife and I were expecting our 1st child, some friends recommended we check out this book (the 2012 edition at the time). So I went on , found the book and decided to check it out. For the price, it was a no-brainer. When it arrived, I was blown away at all the information it had in it. i was expecting it to outline how to save money on various baby products, which it does, but it also has tons of information on the products as well. I really liked the individual product reviews as well as the comparisons to similar products and how the book rates each product. Overall this is a excellent book and I think that it helped us out tremendously and it would do the same for any parent, new or seasoned.

One of the thorniest questions new parents ask themselves is how they are ever going to pay for baby expenses. With the average cost of a baby topping \$6,000 for the first year alone, expectant moms and dads need all the creative solutions and cost-cutting ideas they can find. Baby Bargains is the answer. The book lists great deals and money-saving strategies for a wide variety of must-have items, from maternity wear, baby clothes, and diapers to furniture, bedding, and toys. Extensive charts allow parents to compare and contrast name-brand cribs, strollers, high chairs, child safety seats, baby monitors, and more. Now in its sixth edition, the book has been completely revised and updated to include website addresses for all major baby product manufacturers, reviews of parenting websites, and listings for mail-order catalogs and outlet stores. Additionally, the book offers important safety tips for affordably baby-proofing the home.

About the AuthorDenise Fields and Alan Fields write a monthly column for Baby Talk magazine. They have written several best-selling books, including Baby Bargains and Bridal Bargains. They live in Boulder, CO.
