John Bear : Bears' Guide to Earning Degrees by Distance Learning before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bears' Guide to Earning Degrees by Distance Learning:

18 of 19 people found the following review helpful. Well Written and Easy to Use By Jim B. I order this book at the same time I ordered a Peterson's guide -- I could have save a lot of money and just purchased this Bear's Guide. Especially helpful to me is the section identifying the 'degree mill' schools that should be avoided like the plague. I also greatly appreciate the fact that international options are listed. It seems that the British and Australian schools are better aligned for my goals in a graduate degree. There inclusion in this guide gives me a good starting point for my research. The division of programs that can be completed completely by distance from those with some residency requirements is quite useful. The Guide is easy to read use. The style is low key and without pretense. 10 of 12 people found the following review helpful. Bear's Guide to Earning Degrees by Distance Learning By Dr. Joseph S. Maresca This is an excellent reference work for researching the various levels of accreditation by colleges and

universities both here and abroad. Degrees are granted in various genres; namely, the traditional college/university which requires attendance and a rigid credit hour sequence, honoraria, degrees issued by evaluation of relevant work experience and a combination of experiences both classroom and workplace. The volume lists online accreditation for Strayer University. Various schools in the UK are listed under Distance Education. These colleges and universities are Keele, Coventry and Oxford Brooks University. The volume has a wealth of information on colleges and universities throughout the world. The author critiques the level of accreditation, as well as unaccredited institutions and degree mills. This information would be valuable for anyone considering an investment in Distance or Online Education either in the USA or abroad. The acquisition is well worth the price. 2 of 2 people found the following review helpful. Wonderful guide By Phoenix Rising I bought this book years ago. It was detailed and very helpful in helping choose a school. I found my school for undergraduate degree in this book. I recently purchase it to research for another school for my second master degree. This book provide information for decision making. It describes differences between school. Accreditation and diploma mills

For 30 years, BEARS GUIDE TO EARNING DEGREES BY DISTANCE LEARNING is the most comprehensive, respected, and opinionated guide to the potential minefield of non-traditional education. It is often faster, cheaper, and even better to earn an associates, bachelors, masters, doctorate, medical, or law degree off campus. As more schools bring the classroom to the student through mail, video, and the internet, the need for an accurate, up-to-date, and technically savvy resource is more crucial than ever. This is the guide for anyone looking to advance a stalled career, return to the workforce, or take the next step to advance his or her education.

"The authoritative guide to the field." -- Wilson Library Bulletin From the Publisher The 16th edition of the trusted guide that walks the reader step-by-step through the academic labyrinth of degree requirements, transcripts, scholarships, accreditation, equivalency exams, credentials, diplomas, degree mills, and much, much more. Includes more than 2,500 listings no other distance-learning guide offers more! Mariah Bear is a leading expert in the field who, with her father, John Bear, has helped millions to achieve their lifelong goals.
