**Jeremy Enfinger RT(R) : Becoming a Radiologic Technologist: A Student's Guide: from Choosing the Right School to Jump Starting Your Career** before purchasing it in order to gage whether or not it would be worth my time, and all praised *Becoming a Radiologic Technologist: A Student's Guide: from Choosing the Right School to Jump Starting Your Career*:

0 of 0 people found the following review helpful. I love this bookBy Rachel AnschuetzI love this book. Very easy to read, easy to understand, may not be a requirement for school, but I would highly recommend. I wish the author was my prof!0 of 0 people found the following review helpful. Time and Money SaverBy I like StuffThis was perfect for me. It saved me lots of time and money I would have wasted because now I know for sure I don't want to become a radio tech. I know there are many students out there would have loved a similar book in other fields.2 of 2 people found the following review helpful. Great source. I've been thinking of going to school ...By dickybGreat source. I've been thinking of going to school for RadTech. This book shows you what you should expect while in school and what to expect at your job. Had some things that I had not known I would have to contend with, so I'm glad I bought it. Now I know more of what to expect.

This book is intended be used as a resource for people interested in or who are taking their prerequisite courses for becoming a Radiologic Technologist. There are many aspects to researching schools, the health care job market, and keys to success within the field of radiology. There are also many pitfalls like institutions that claim to qualify students to be able to work in a hospital as an x-ray tech after completion of their program, but do not meet accreditation standards needed to acquire the necessary credentials. This guide will provide everything the potential x-ray student needs to research accredited schools, be successful in a radiography program, and stand out among peers to gain a competitive edge when seeking a job after graduation.

About the AuthorJeremy Enfinger is an experienced Radiologic Technologist, Radiography Program Instructor, and published author. He has served in leadership roles in hospital, outpatient and academic settings. His experience includes writing examination questions for the national ARRT Radiography Exam and multiple - modality training. He continues to pursue excellence in education and patient care. An avid blogger, Jeremy strives to promote standards of excellence in imaging through his online community with the sharing of veteran tips and techniques for high quality imaging.
