Scientists, engineers, computer specialists and other technical professionals have historically found themselves in demand. However, the recession of the early 1990s and the dynamics of world politics have put highly qualified engineers, scientists and other technical professionals in the ranks of the unemployed. This updated guide describes how scientists and engineers can learn to prepare powerful and effective resumes. A step-by-step manner uses worksheets to help to organize the information. Sample resumes covering representative disciplines found in high-technology industries are included as models.
