National Geographic Maps - Reference : Britain and Ireland Wall Map (tubed) British Isles before purchasing it in order to gauge whether or not it would be worth my time, and all praised Britain and Ireland Wall Map (tubed) British Isles:

8 of 8 people found the following review helpful. Fantastic map By Shopsmith National Geographic really makes the most detailed and attractive maps on the market. Great detail of cities, towns and villages. Parklands and preserves are highlighted, boundaries of England, Scotland, Wales, Northern Ireland, Ireland are well demarcated, without being overwhelming; roads are well indicated. Topography is illustrated well. All in all, a really well designed map. For fun, I glued this onto poster board before hanging on the wall. I stick pins on all the spots I want to visit on my next trip to the UK. Perfect! 1 of 1 people found the following review helpful. My map is like others who have reported the edges being crinkled but ... By Al M. It's not nearly as big as the product details make it seem. It's actually 23.5 x 30.25

inches. I was definitely hoping for a bigger map for trip planning purposes. I'll use this in the meantime but will keep looking for a bigger map. My map is like others who have reported the edges being crinkled but I suppose that's the price you pay for delivery rather than picking it up in a store somewhere. 1 of 1 people found the following review helpful. Wall deco and daydream fuel in one? Yes please. By Larissa I bought this so that I could hang it on my wall with my old routes traces on it and my future destinations pinned out. It serves this purpose very nicely and I daydream often. :) I didn't expect it to be so beautiful though! The colors are very vibrant, the paper is high quality, and it has a pretty impressive amount of detail (the tiniest of tiny towns don't make it on, but most of the places you'd like to be on a map are there). If you're a map person or a travel person or a UK/Ireland person, this is a good buy.

National Geographic Classic political map of Britain and Ireland is both an attractive addition to any study or classroom and an informative tool for exploring these fascinating countries. The map features thousands of place names, major highways and roads, airports, ferry routes, bodies of water, and more. Handy indexes make it easy to identify the counties, districts, council areas, unitary authorities, and metropolitan districts of Ireland, Northern Ireland, Scotland, Wales, and England. An inset provides detail of the Shetland Islands. National parks are clearly indicated in green vignettes, and shaded relief reveals the interesting and varied topography of these island nations. English and Gaelic (Irish) share official status per the Republic of Ireland's constitution, so place names are rendered in both. In the Gaeltacht, or predominantly Irish-speaking regions, only Irish place-names have official status and are used on signposts. These districts are found within the counties of Cork, Donegal, Galway, Kerry, Mayo, Meath, and Waterford. The map is packaged in a two inch diameter clear plastic tube. The tube has a decorative label showing a thumbnail of the map with dimensions and other pertinent information. Map Scale = 1:1,679,000 Sheet Size = 23.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
