This book is all and \*only\* about Chevrolet's efforts in the old Trans-America road race series. As you may know, the desire to be competitive in Trans-Am led to Chevrolet developing the Z/28 option package in the first place. Hood induction, twin carburetion on the 302, chassis set up, and the famous JL-1 (SP?) four-wheel disk brakes are all covered in great detail. If your interest lies in the first generation Camaro OVERALL, then I'd skip this one. 1st gen Z car enthusiasts, however, will love this book.1 of 1 people found the following review helpful.
